## PROJECTS

### 2 Phaser 3 games

After watching some online guides, I developed 2 browser games made in the Phaser3 Javascript Framework, one being a Side-scroller and the other one a Platformer. Both can be played on my personal site, and the code can be found on my github page.

### Weather forecast webpage

Using JavaScript and a Weather API, I made a basic webpage where you can search a location and see the current weather. The webpage can be found on my personal site.

### Toy Social Network

Developed a Toy Social Network with the help of another student, made in Java, using JavaFx and PostgreSQL. The code can be found on my github page.
